What is the Bioeconomy?

According to the [European Commission](#), the bioeconomy comprises those parts of the economy that use renewable biological resources from land and sea – such as crops, forests, fish, animals and micro-organisms – to produce food, materials and energy.

Did you know that the Bioeconomy is key to create jobs and boost sustainability?

- It could create [1 million jobs](#), particularly in rural and coastal areas, by 2030.
- It generates an [annual turnover](#) of around 2 trillion euro.
- Reduce [emissions](#) and our dependence on fossil resources.
- It contributes to [enhancing biodiversity and restoring degraded ecosystems](#) by 2020.

What's in the Bioeconomy for me?

New [job opportunities](#)

A career with growth potential.

The opportunity to work with new tools and [technologies](#).

An increase on start-ups and [entrepreneurial initiatives](#).

Being part of the Bio-based industrial sector community; a highly [innovative](#) and demanded field of professionals.

The [UrBIOfuture experience](#) will deliver insights, face-to-face meetings with employers and specialists, as well as visits to bio-based industries in several European regions.

PARTNERS

UrBIOfuture is a European initiative that aims to bring Europe to the forefront of the bio-based sector by boosting careers, new educational programmes and research activities. This will contribute to reach [the circular bio-society](#) challenges by 2050.
